Armstrong and Aldrin were not due to begin their walk until 7.17 a.m. after several hours' rest, but before midnight they asked

**M**AN set foot on the moon at 3.56 a.m. E.S.T. today when Armstrong, 38, stepped down from Eagle, the lunar modul earlier than originally planned. He was followed 16 min

At about 3.55 a.m., as the first live pictures came over, Armstrong was seen climbing down backwards. As he explored the ground with
